

Product search and lister pages 3.1.0

- [Overview](#)
- [Product lister page](#)
 - [Annotations](#)

Overview

Default theme implementation selects between the following template variations in order to render product list view:

Template variation	Condition	Notes
searchrez	When keyword search is used	Note that this can be global search without category selection.  Custom template for category search can be set on product type search template variation .
products	Category product lister including filtered navigation and category search.	 Custom template for category search can be set on product type search template variation .

Annotations

Element	Template	Configurations ¹	Content include ²	Description
C.1 Product pod	Products view	Product or SKU image "IMAGE0". Category level image size attributes are "PRODUCT_IMAGE_WIDTH" and "PRODUCT_IMAGE_HEIGHT". Shop level image size attributes are "SHOP_PRODUCT_IMAGE_WIDTH" and "SHOP_PRODUCT_IMAGE_HEIGHT".		Displays individual product items. ⚠️ This view is fully responsive, so size settings only influence the quality of the image
C.1.1 Product pod tax	Products view	"SHOP_PRODUCT_ENABLE_PRICE_TAX_INFO" - flag to display tax or not "SHOP_PRODUCT_ENABLE_PRICE_TAX_INFO_SHOW_NET" - flag to show net or gross prices "SHOP_PRODUCT_ENABLE_PRICE_TAX_INFO_SHOW_AMOUNT" - flag to show either percentage or amount of tax		Displaying tax information is configured at shop level
F.1 Footer	Standard footer			This component is described in Home page documentation
H.1 Header	Standard header			This component is described in Home page documentation
M.1 Breadcrumbs	Breadcrumbs			Automatically resolves current breadcrumbs path depending on the URI
M.2 Category navigation	Top categories			Displays current menu depending on current category selected. For leaf category menu highlights its position, for categories with sub categories its menu is displayed.
M.3 Price facet	Price product filter	Category "navigation by price" flag and "price tiers".		Price facet is calculated for products within a category. ⚠️ Not visible on global search

M.4 Attribute facets	Attribute product filter	Category "navigation by attributes" flag and "product type". Product type "navigation" flag, "navigation type" and "ranges" for ranged values.		Attribute facets are calculated for products within a category.  Not visible on global search
M.5 Brand facet	Brand product filter	Category "navigation by brand" flag.		Brand facet is calculated for products within a category.  Not visible on global search
M.6 Sort options	Product sorter	Category level sort fields "CATEGORY_SORT_OPTIONS". Shop level sort fields "SHOP_CATEGORY_SORT_OPTIONS".		Renders sorting options available to current category
M.7 Pagination options	Products per page list view	Category level sort fields "CATEGORY_ITEMS_PER_PAGE". Shop level sort fields "SHOP_CATEGORY_ITEMS_PER_PAGE".		Renders pagination options available to current category
M.8 Pagination	URL paging navigator			Automatically renders page numbers available for given search results
P.1 Featured products				This component is described in Home page documentation
P.2 Product tabs				This component is described in Home page documentation

¹Configurations refer to [shop](#) and [category](#) custom attributes that define behaviour of components

²[Content](#) include refers to shop URI suffix for content. For example if shop has code "SHOP10" and content include is specified as "custom_content" then URI of the content include that will be rendered is "SHOP10_custom_content"
