

Profile page 3.0.0

- [Overview](#)
- [Customer profile pages](#)
 - [Annotations](#)

Overview

Default theme customer's profile page contains four sections:

- Mandatory information containing email and name
- Additional information containing profile attributes enable for current shop
- Password section that allows to reset password, which is sent to customer's email address
- Address book listing addresses for allowed shop's locations

Profile page template anticipates that all shop specific attributes visible to the customer will be defined by additional attributes. Rest of the information is used directly by platform functions such as authentication and shipping/billing information during [checkout](#).

Annotations

Element	Template	Configurations ¹	Content include ²	Description
C.1 Mandatory information	Summary panel			

C.2 Additional information	Dyna form panel			Section for configuring shop specific profile page
C.2.1 Additional information attributes	Dyna form panel	Shop level attribute "SHOP_CUSTOMER_PROFILE_ATTRIBUTES_VISIBLE". Shop level attribute "SHOP_CUSTOMER_PROFILE_ATTRIBUTES_READONLY" for read only.		Elements of form are automatically rendered depending on the custom attribute definitions. There are two settings, one for attributes to be shown and another for specifying which of these attributes are read only. This configuration is explained in customer profile management .
C.2.2 Additional information content	Dyna form panel		"profile_dynaform_content_include"	Allows to add additional information. E.g. how to fill in the form, advice on how data will be used etc.
C.3 Password reset button	Password panel			Button that allows to re-generate password for customer and send it via email.
C.4 Address book	Manage addresses	Shop level "shipping" and "billing" location settings		Address book component allows to list all addresses for which location is allowed by current shop.
C.5 Address update form	Create/Edit address page	Shop level "shipping" and "billing" location settings		Allows to add or update addresses. Locations selection is limited by shop location settings.
F.1 Footer	Standard footer			This component is described in Home page doc umentation
H.1 Header	Standard header			This component is described in Home page doc umentation
M.1 Sections nav				Javascript backed navigation that allows to just between sections of the page

¹Configurations refer to [shop](#) and [category](#) custom attributes that define behaviour of components

²[Content](#) include refers to shop URI suffix for content. For example if shop has code "SHOP10" and content include is specified as "custom_content" then URI of the content include that will be rendered is "SHOP10_custom_content"
